PROGRAM DESCRIPTION

The "Essentials of Oncology" online clinical program, facilitated by the Medxury Oncology Department, is a comprehensive program tailored to provide participants with a foundational understanding of the fundamental concepts, principles, and key areas within the field of oncology. This course aims to serve as a solid starting point for individuals seeking a comprehensive overview of cancer care and management.

- » Expert-led Sessions: Conducted by experienced oncologists, researchers, and healthcare professionals specializing in different areas of oncology.
- » Interactive Learning: Incorporating case studies and discussions to facilitate active learning and engagement.
- » Accessible Online Platform: Access the course content from anywhere, providing flexibility for busy schedules.
- » Certificate of Completion: Participants will receive a certificate upon successfully completing the program and the assessment of a minimum of 50%.

Join us in exploring the intricate world of oncology and broaden your understanding of cancer diagnosis, treatment, and patient care through the "Essentials of Oncology" clinical program.

The course will be available for enrollment online through the Medxury Oncology Department's website. [VISIT](#) ↗
